Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a process for separating isomers and intermediate salts, classified in class 564, subclass 86.
- II. Claims 22-27, drawn to carbamate compounds and processes, classified in class 560, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are distinct because the two sets of compounds are so structurally disparate that a reference anticipating one set of compounds would not necessarily render the other set obvious. Applicants' process for determining optical purity utilize disparate chemical reactions with different functional groups.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Schwarze on 6 December 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1621

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to Peter G O'Sullivan at telephone number (571)272-0642.
